

A WORLD FIRST

This is the first design of a real combination wingtip light suitable for most of the RV models. It gives you a 15 high power LED Landing light, a Strobe light and a Navigation light, all in one.

A set of simple brackets makes it easy to install The beam inclination is easily adjustable to cater for nose wheel as well as tail dragger aircraft.

Modular:-	The modular design makes it easy to install and also replacement of an individual light module should one fail
Functions:-	Wig-wag and strobe sync functions are built in as standard
Total Current drain:-	Landing light = 0.7A Strobe light = 2A while flashing Navigation light = 0.36 A
Lumens:-	Landing light = 1500 Lumens Strobe light = 2760 Lumens Navigation light = 360 Lumens
Other:-	Splash proof and weighs +-500 gram

Detailed specifications and wiring on request. Visit www.rvbits.com to find out where to buy.
